- ① 酒店、商场旋转门异型设计: 圆形旋转门广泛使用铝合金地垫, 底部配置的铝合金地垫一般也制作成圆形, 先安装地垫, 再安装旋转门。
- ② 地形复杂的机场、商场、高铁站等异型设计: 这种地方一般凹凸比较多, 常规的方形铝合金地垫需要多块拼接才能达到要求, 但接缝处太多影响美观, 因此需要通过精确测量和计算之后, 进行异型设计。

### Provide a full range of professional profiled design:

(1) Special-shaped design of revolving doors in hotels and shopping malls: Aluminum alloy floor mats are widely used in circular revolving doors. Aluminum alloy floor mats with bottom configuration are generally made into circular ones. First, the floor mats are installed, and then the revolving doors are installed.

(2) Airports, shopping malls, high-speed railway stations and other irregular designs with complex terrain: This kind of place usually has more concave and convex. Conventional square aluminium alloy floor mat need multiple splices to meet the requirements, but too many joints affect the beauty, so it is necessary to carry out irregular design after accurate measurement and calculation.
